

# MAFT 555 - Research Methods

|                           |   |            |           |
|---------------------------|---|------------|-----------|
| Teacher                   | Dr. T. Milliron   |            |           |
| Semester                  | Spring  | Duration   | 8 Weeks   |
| Frequency                 | Every three years   |            |           |
| Credits                   | 5 ECTS  | Workload   | 150 Hours |
| Module format             | Intensive   |            |           |
| Applicability             | This Module is particularly helpful in the writing of the thesis and the development of interventions with the statistical programs necessary to analyze the individual case studies. |            |           |
| Course structure          | See <a href="#">module and courses</a>  |            |           |
| Contact time              | 40 Hours  | Self-Study | 110 Hours |
| Participation requirement | See <a href="#">access to the program</a>   |            |           |

| Evaluation            | Evaluation  | Hours      | Weight      |
|-----------------------|---|------------|-------------|
|                       | Phase 1   | 50         | 20%         |
|                       | Readings & Research and Developmental Plan  | 50         | 20%         |
|                       | Phase 2   | 40         | 50%         |
|                       | Participation   | 30         | 10%         |
|                       | Daily Quizzes   | 5          | 10%         |
|                       | Exam  | 5          | 30%         |
|                       | Phase 3   | 60         | 30%         |
|                       | Research Paper  | 60         | 30%         |
|                       | <b>Total</b>  | <b>150</b> | <b>100%</b> |
| Content of the Module | <p>Methods and tools of research and evaluation, focus on research data interpretation and emphasis application to professional practice. Utilization of the computer for data analysis will be emphasized.</p> <p>This course will cover the research skills needed by marriage and family therapists. The focus will be on applied issues relevant to clinical settings, including accessing and evaluating the appropriate research literature.</p>  |            |             |
| Learning Objectives   | <p>A. General Learning Objectives</p> <p>This course seeks to:</p> <ul style="list-style-type: none"> <li>• Know the extant MFT literature, research, and evidence-based practice (AAMFT 6.1.1).</li> <li>• Understand research and program evaluation methodologies, both quantitative and qualitative, relevant to MFT and mental health services (AAMFT 6.1.2).</li> <li>• Understand the legal, ethical, and contextual issues involved in the conduct of clinical research and program evaluation (AAMFT 6.1.3).</li> </ul> <p>B. Specific Behavioral Objectives</p> <p>As a result of the activities and study in this course, the student should be able to:</p> <ul style="list-style-type: none"> <li>• Read current MFT and other professional literature (AAMFT 6.3.1).</li> <li>• Use current MFT and other research to inform clinical practice (AAMFT 6.3.2).</li> <li>• Critique professional research and assess the quality of research studies and program evaluation in the literature (AAMFT 6.3.3).</li> <li>• Determine the effectiveness of clinical practice and techniques (AAMFT 6.3.4).</li> </ul> |            |             |

|                   |  |
|-------------------|--|
| Outline           | <ul style="list-style-type: none"> <li>• Research Methods</li> <li>• Descriptive Statistics</li> <li>• Inferential Statistics</li> <li>• Overview of Relationship Science</li> </ul>   |
| Examination       | See Evaluation   |
